To limit the xm radio content that I pay for is absurd. I pay for the programming, not the people who are afraid of competition because they refuse to offer the same service. Instant weather and traffic for my area, that I can call in and report accidents, I pay for it. Commercial free music that plays good stuff, I pay for it. This lobby crap is exactly what is wrong with our country to begin with. What ever happened to we the people. Now, it seems, it is we the rich corporations. Give the people what we want, and let the corporate world learn thier lesson.
